# Future sales prediction

GEEKSFORGEEKS

Sales Forecast prediction_
Python
Forecast prediction is predicting
a future factorsing past values
and many other factors.   In this
tutorial,We will create a sales
forecasting model using the
Keras functional API

Proposed Work

BIG MART SALES PREDICTION

Sales forecasting it is determining present day or future sales using data like past sales, seasonality,festivities,economic condition

LinearRegression Sales Forecasting Prediction

XGBoost Sales Forecasting Prediction

RandomForest Sales Forecasting Prediction

So,this model will predict sales on a certain day after being 0rovided with a certain set of inputs .
